

Compeat Cloud Install

In order to access your hosted Compeat system you will need to install the Compeat Advantage Client on each workstation that needs access. Installing the Compeat Advantage client requires administrative rights on the workstation to which you are installing.

Enter this address into the workstation web browser:

<https://cloud.compeat.com/CompeatServices/>

The Compeat Client Updates page will open. Select “Compeat Advantage”:

1. Select **Run** from the Download File dialog.
2. If you receive a security warning, select **Run**.
3. When you receive the message saying that the Compeat Advantage Client will be updated, click **Yes** to continue.
4. Once the Wizard opens, click **Next**, then click **Finish after the install**.
5. A dialog will display with server information. The Server Address will default to yourserver@yourdomain
6. **IMPORTANT:** You must change the Server Address to: **https://cloud.compeat.com** (notice the “s” after http). Please leave the Windows User/Password as the default, there is no need to change this. Click on **Install**.
7. You will receive a final notification that the installation was successful. Click **Close** to finish.

Compeat Installer

Application: Advantage

Server Address: https://cloud.compeat.com

Windows User: CompeatServices

Windows Password: *****

Leaving the user properties empty will result in the current user's credentials being used.

Install Cancel

You are now ready to log on to Compeat!
